

1. Cut out the square below.
2. Fold on the lines taking care to keep the template facing forward: fold diagonally on the long line to create a triangle. Fold in half again to form a smaller triangle. Then fold the sections on either side of the template towards the back.
4. Cut away the grey areas. (If available, a hole punch works best for the eyes).
5. Unfold the paper to reveal your *Juno The Star* snowflake!
